Canyon Ferry Harvest Tables

These tables show the percentage of fish harvested (kept) from 2002, 2003 and 2004 creel data. Data for walleye, perch and ling (Tables 1, 2 and 4) are broken into ranges to show % harvest and % anglers who keep fish across specified ranges. Data for rainbows (Table 3) is broken into number of rainbows kept per angler. Tables include all anglers, regardless of what species is targeted.

Table 1. Percent of walleye harvested and percent of anglers harvesting walleye in each specified range from summer 2002, 2003 and 2004. Data from all anglers, regardless of target.
